## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-21 are rejected under 35 U.S.C. 102(e) as being anticipated by Kannas et al. (Kannas), U.S. Patent No. 6,683,853.

Regarding claims 1-21, Kannas discloses a method (and a mobile station and admission control device and program) of an admission control device in a mobile communication system capable of providing a first communication that guarantees a predetermined quality and a second communication that does not guarantee the predetermined quality at a mobile station, comprising: a step of sending a notification of the predetermined quality to the admission control device by the mobile station when a request for the first communication is made; a step of calculating, by the admission control device; a reference quality admissible when a propagation quality is lowest at the mobile station; and a step of determining, by the admission control device, whether to admit the request of
